## Processing Questionnaire

TMPI is committed to protecting our employees and the environment. Also, by cleaning your parts, TMPI is taking on the responsibility for the waste generated. Therefore, the disclosure of the nature of the contamination on the parts is appreciated.

TMPI will refer you to a decontamination service for certain types of contamination, after which TMPI can provide precision cleaning to you. Parts with other contaminations are accepted as long as you disclose the presence.

1. **Parts with the following contaminations should not be shipped to us, but we will refer you to a decontamination service:**

Phosphorus, Arsenic, Beryllium, Thallium, Selenides or Tellurides.

Residual process precursors: such as Metal-Organics, or those of pyrophoric nature (detonation hazard) such as Silane *if there is reason to assume that they are still present.*

Contamination with Mercury, Zinc, Indium or Cadmium.

Alternating layers of Aluminum or Nickel, or similar structures which may react.

All parts with unknown contamination or giving off noxious gases.

Bio-medical parts, exposed to bodily fluids and unsterilized.

2. **Please help us better protect all parties involved by disclosing the potential presence of:**

Deposits containing Magnesium or Zinc (Circle all that apply and indicate any others here \_\_\_\_\_)

Gaseous or liquid CVD precursors or dopants which could be trapped in blind volumes or gases absorbed in solid contaminants. All lines, valves, flow controllers, etc. must be purged and all valves must have been activated before we can accept parts. Please list any chemicals that the parts were exposed to and provide MSDS if possible.

Bio-medical parts, exposed to bodily fluids but sterilized.

**2.1 Please assist us in processing your order by supplying us with the following information:**

Please list the base-material composition of the parts: (circle all that apply)

Al, SS; type \_\_\_\_\_, Titanium, Copper, Copper-Beryllium, Nickel, Molybdenum, Silicon, Carbide, Graphite, Quartz, Other \_\_\_\_\_

Please list what contamination there is to be removed; (circle all that apply)

Al, Chromium, Titanium, Copper, Nickel, Silver, Silicon, Oxide, Nitride, Lube/Oil/Coolant/Vacuum Grease (please attach MSDS), Other \_\_\_\_\_ (please attach MSDS if possible);

1. Do you have a **specific cleaning procedure** you would like us to use? (If not, TMPI will use their proprietary cleaning process)?

\_\_\_\_\_

Do you require special packaging of your parts after it is cleaned? (Clean room packaging is standard)

\_\_\_\_\_

(Circle all that apply and indicate any others here \_\_\_\_\_)

(Signature)

(Print Name)

(Date)
